

Given an integer N, write a program to count the number of digits in N.

Input Format

Example 1: Input0: N = 12345

Example 2: Input1: N = 8394

Constraints

$N \leq 10000$

Output Format

Output0: 5 Explanation: N has 5 digits

Output1: 4 Explanation: N has 4 digits

Sample Input 0

12345

Sample Output 0

5

Answer:

```
N=int(input())
```

```
Print(len(str(N)))
```
